

The hygienic solution to avoid contagion in armoured doors

Powerturn automation

Automatic swing door drive for one or two leaves. Door can be opened without the need for touch contact, contactless.

Handle HandsFree

The handle HandsFree for doors allows you to unlock your front door without using your hand, just by moving your foot through a spotlight on the ground.

Antimicrobial paint

Leaf and frame paint treated with antimicrobial additives, Biocote®, which provide lasting and effective protection against harmful bacteria, mould, fungi and viruses.

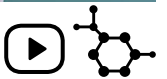

D-Smart system

D-Smart device to automate locks with euro-profil cylinder.

Antimicrobial handle SecuSan®

Door handle with antimicrobial finish. SecuSan® is a special surface that immediately suppresses microbial growth on a lasting basis. It is entirely maintenance-free and designed for long-term usage.

Combine the 5 integrated systems. Durable and contactless.

Combine these 5 systems on the armoured door to increase security comfort and hygiene at home.
